DN-10 Flexible Coupling, 5.2" Free Length

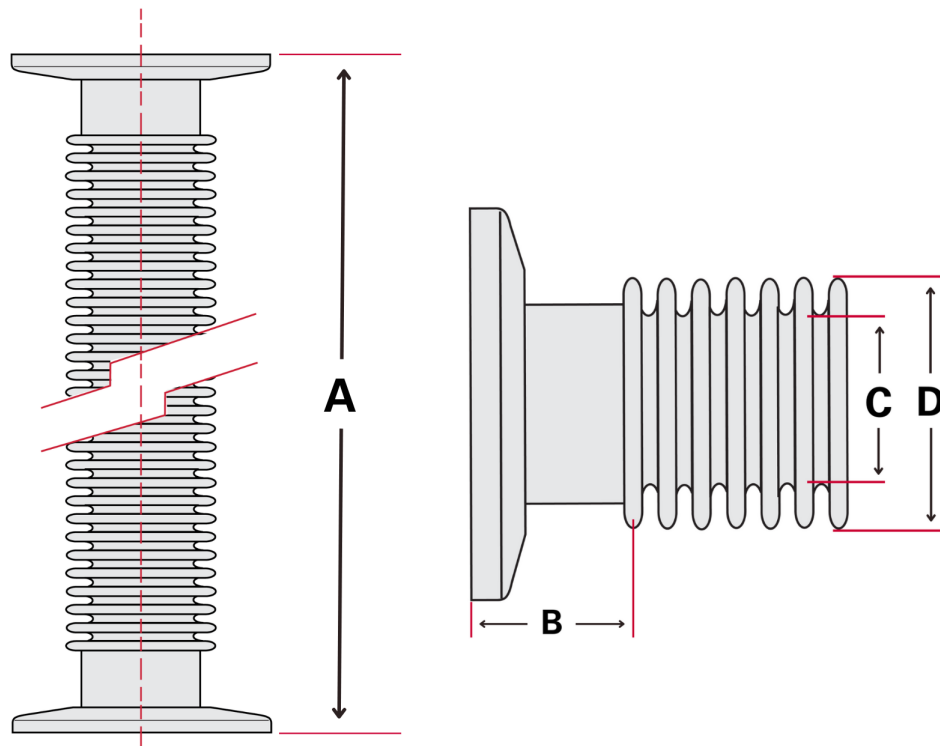

**Part number:** 2FC-NW-10-3

# ISO-KF Flexible Coupling

## DN-10 Flexible Coupling, 5.2" Free Length

- Dampen out pump vibrations with a flex coupling
- Easily join two mis-aligned ports using a flex hose
- Standard lengths and flange combinations offered, with others available

### Part Number: 2FC-NW-10-3

| Parameters             | Specifications                                                                                                   | Dimensions<br>(in inches) |         |
|------------------------|------------------------------------------------------------------------------------------------------------------|---------------------------|---------|
| Flange Type / Size     | DN 10 ISO-KF                                                                                                     | Dim A                     | 5.2"    |
| Nominal Diameter       | 3/8"                                                                                                             | Dim B                     | < 1"    |
| Axial Stroke           | Up to +/- 10% of Dimension A                                                                                     | Dim C                     | > 0.35" |
| Bellows Material       | 316 or 321 SS                                                                                                    | Dim D                     | < 0.8"  |
| Flange & Cuff Material | 304 SS                                                                                                           |                           |         |
| Vacuum Range           | Elastomer Seal (HV): $> 1 \times 10^{-8}$ mbar to 1 bar<br>Metal Seal (UHV): $> 1 \times 10^{-10}$ mbar to 1 bar |                           |         |
